

****Task****: Create a console application that prints "Hello, World!" to the console.

****Objective****: Understand how to create and run a basic C# console application.

****Sample Code (C#)****:

```
```csharp
```

```
using System;
```

```
class Program {
```

```
 static void Main() {
```

```
 Console.WriteLine("Hello, World!");
```

```
 }
```

```
}
```

```
```
```
